

Sherwood Trash Receptacle

The Sherwood is the “basic” trash receptacle that we use for Huntco’s custom-designed waste containers. Laser cutting of logos, emblems and insignia on sheet metal and an unlimited range of powder coated colors enable us to produce a receptacle that is made for a specific location. These heavy-duty steel containers hold 32 gallon, rigid, removable plastic liners and have three lid choices: flat, dome and ash/dome. The Sherwood is 36” high (45” high with dome top) and 24” in diameter.

- Constructed of perforated steel sheet and solid steel sheet.
- Available with three different tops.
- Mounting: Surface mount or in-ground mount.
- Powder Coated Finish (weather resistant Polyester TGIC, (6-8 mils thick) in an unlimited range of colors.

Dimensions shown are for a 32 gallon capacity Sherwood Trash Receptacle.

All Sherwood tops can be secured with aircraft security cable.
